### **DETAILED ACTION**

Claims 1-46 are pending in this application.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-21, drawn to a reactor, classified in various classes and subclasses.
- II. Claim 22, drawn to a method of use, classified in various classes and subclasses.
- III. Claims 23-46 in part, drawn to a process consisting of acetoxylation of olefins, classified in various classes and subclasses.
- IV. Claims 23-46 in part, drawn to a process consisting of the reaction of ethylene, acetic acid and oxygen to produce vinyl acetate, classified in class 558.
- V. Claims 23-46 in part drawn to a process consisting of oxidation of ethylene to acetic acid, classified in class 560.
- VI. Claims 23-46 in part drawn to a process consisting of the oxidation of ethane to ethylene, classified in class 568.
- VII. Claims 23-46 in part, drawn to a process consisting of the ammoxidation of propylene, propane or mixtures thereof to acrylonitrile, classified in class 558.
- VIII. Claims 23-46 in part drawn to the oxidation of C4's to maleic anhydride, classified in class 549.

The groups are distinct, each from the other because:

Inventions in Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product.

Inventions in Groups III, IV, V, VI, VII, and VIII are drawn to different processes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
